

On-site Technical Staffing Services

At Paton, we provide more than just staffing by offering strategic solutions and premier engineering talent. We pride ourselves on our responsiveness, personal care and industry knowledge.

Most Process Industry End-Users operate with much leaner staffs than they once did. The continuous pressure to get more done with fewer resources can at times strain an organization. To accommodate reduced headcounts, companies partner with providers of plant services to strengthen resource needs. Benefits to this approach include:

- > Reduced Employee Overhead
- > Need Based Availability
- > Flexibility of Increasing or Decreasing Resources Based on Workload

Paton Engineers and Constructors have been placing contract engineers and technical support staff with clients since 1984 – nearly four decades of history in developing our workforce challenges of the engineering community, across an array of specialized industries. We integrate into your organization to supplement your staff with our expert resources.

Value Proposition

- > Our services commence in FEED for system definition, plant completion planning and operability in design.
- > Cold Eye Review Teams for major capital projects.
- > Field Service Teams including P&ID walk down, inspection teams, electrical technicians, mechanical specialists.
- > Seamless interaction with plant operations, augment teams or provide entire management team and process.

Satisfying Our Clients Is #1

- ☑ We strive to understand the individual needs and objectives of our clients.
- ☑ We endeavor to be knowledgeable about our industry and employment markets.
- ☑ We constantly seek innovative ways of improving the quality of our service and increasing our value to our clients.
- ☑ We keep our commitments – 100% of the time.
